Yukon Utilities Board
Box 31728
Whitehorse, Yukon Y1A 6L3

Dear: Ms. Henry and Board Members,

RE: AEY and YEC Application for T&C Modifications
Tr'ondëk Hwëch'in Government, Registration as Intervenor

The Tr'ondëk Hwëch'in Government would like to register as an intervenor in the proceeding to review the T&C application presented by the two utilities. We plan to participate in all aspects of this rate hearing to protect the interests of low-income families within our community, particularly concerning the proposed rate increases.

We are keen to understand how these revisions will impact ratepayers both in the short and long term. Additionally, we look forward to discussing the alternatives the utilities have considered to control costs and improve efficiency, aiming to keep T&C charges stable or only subject to inflationary increases.

We need more insight into how the annual inflation factor for both the maximum company investment and supplementary charges could lead to unpredictable and rising costs. It's also important to discuss how increased fees for connection/reconnection services and meter accuracy tests could impose additional financial burdens on those who need them.

We should inquire if any impact analysis has been conducted to assess how these changes will affect the TH First Nation community at large, particularly regarding potential rate increases and financial burdens.

Until more information is provided through the information request process, it is too early to determine if we will need to submit additional evidence.

We respectfully request that the YUB fulfills all its previous mandates and applications before proceeding with any new processes.

Can you please copy all communications related to this application and its review to Bipin.kothyari@trondek.ca.

Mähsj Cho,

Bipin Kothyari
