---

I'd like to comment against the insane idea of a rate increase.

ATCO has continually gone over the set rate. ATCO continues to break the law without consequence.

This company has made millions in profit off our most vulnerable Yukoners trying to keep lights and heat on. They are taking just to increase profits to shareholders of an essential service - there is no need for ANOTHER rate increase. I work in education and see the always increasing bills straining students families and our Elder co teachers.

Any rate increase is actual insanity borrowing from politics from our southern neighbour, and should be illegal as ATCO posts record profits to private shareholders. Dip into dividends instead of screwing over families, Elders and everyone working out butts off to keep lights and heat on.
