Re: Rider R1 Submission

Dear Ms Henry

I am greatly disturbed to see yet another rider being put onto our electric bill. Currently the Yukon Energy Revenue Shortfall Rider that we pay is 50% of our actual electrical use. We are self-employed and cannot charge our customers revenue shortfall if the amount made for the job does not meet our expectations of what we should be making. We should only be paying for the electricity we use. In my opinion these riders are an indirect way to increase the energy charge, making it look like we are paying less per kwh of electricity than we actually are. You say we are paying \$.13 per kwh of electricity when in actuality it is more like \$.20 per kwh of electricity.

I respectfully request that this new rider not be implemented.

Sincerely,

Patricia Bort
