Dear Board Chair and YUB Members

After further review of the LWRF Reports, UCG would like you to replace our first lower comments of UCG with the following.

UCG is concerned about this filing received from YEC on the 2021 LWRF for the following reasons:

1. UCG cannot find any reporting by the YEC on the YUB web site for the 2020 LWRF.

As such any continuity is impossible to follow. Also there is no rationale for the taking of money from this fund in 2020; i.e, no demonstration that there was low water etc.

2. Is YEC asking for approval of all transactions of the LWRF prior to this 2021 schedule?

3. This 2021 report filed is also confusing as the data represented in Table 1-2 LWRF Continuity Schedule states:

A For Opening Balance claims (\$4.272 million) meaning a refund of this amount as it is brackets

B For Incremental 2021 claims (\$7.019 million) again meaning a refund of this amount as it also is in brackets

This should result in a positive amount of (\$11.291 million) refund owing to ratepayers

4. In the last filed report on the YUB web site of July 29,2022 Table 1.1 LWRF for 2021 does not match this latest report. There is no continuity schedule from 2019 to 2020 to follow.

5. The same July 29,2022 gives a 2022 forecast in Table 2 LWRF Schedule. Accordingly, when can we expect the YEC to secure a final 2022 with a report and continuity schedule?

To conclude, lack of continuity reporting and confusion in reporting marks UCG continuation of mistrust of the YEC driving this mechanism.
